

The **Motherson Group** is one of the 21 largest and fastest growing full system solutions providers to the global automotive industry, serving multiple further industries, such as rolling stock, aerospace, medical, IT, and logistics, with over 135,000 employees across 41 countries worldwide. **Samvardhana Motherson Reydel Companies (SMRC)** is the group's specialist for innovative car and truck interiors. With facilities in Europe, Asia, and South America, we design, develop, and manufacture complete high-quality interior systems, such as cockpits, centre consoles, door panels, and decorative surfaces for multiple vehicle manufacturers worldwide. Given our fast growth, we are constantly looking for talented new colleagues to become part of our team.

FRANCE - HARNES - TECHNICAL CENTER

LABORATORY TECHNICIAN

Your tasks.

- Attached to the Engineering Department and the Laboratory Validation Department, the Test Technician carries out the tests necessary for the development and/or validation of products and processes in compliance with customers and internal requirements
- Uses test methods adapted to the objectives previously defined
- Adjusts the regulation parameters of the test methods according to the constraints of the implemented tests, detects the problems of the tests and measurement methods, and evaluates their impact.
- Processes the numerical data of the tests using the appropriate statistical tools
- Draws-up tests reports
- Proposes improvements to existing measurement and testing methods (new technology, instrumentation, regulation, process)
- Carries out first level control and maintenance operations of the test methods.
